FEBRUARY 13, 11AM-12PM PST

This webinar will provide an overview of the Department of Energy's ARPA-E Sensing Exports of Anthropogenic Carbon through Ocean Observation (SEA-CO2) program, which seeks to accelerate the development of the mCDR carbon capture industry through the advancement of scalable Measurement, Reporting and Validation (MRV) technologies. Come learn about this new federal program and the projects it's funding, and the need for MRV for mCDR.
